

Spring welcomes budbreak, vigorous growth, and the first flowers on the vines. The vineyard bursts with new life as buds form into leaves and tendrils. Bees, lacewings, spiders and ladybirds move quietly through the foliage, enriching the land's precious biodiversity.

Colourful cover crops bloom, competing for water and balancing soil moisture after winter rains. As they decay, they return nutrients to the soil. This youthful abundance inspires our seasonal menu, showcasing locally-sourced produce in celebration of our organically-farmed wines.
